

VentureNest Admin Dashboard Web App Roadmap

Admin Website Specification & Mentor-Student Interaction UI Panel

1. Module Overview & Purpose

The Admin Dashboard Web Application (Port 3002) provides platform administrators with tools for RBAC role management, system health telemetry, AI token quota limits, and audit logs. This guide specifies the roadmap for rendering the Mentor-Student Interaction Panel.

2. Mentor-Student Interaction UI Panel Specification

A dedicated UI section will be added to the Admin Dashboard under 'Incubator Analytics'. This panel displays top-level KPIs (Total Interacting Students, Active Mentors, Engagement Rate) and an interactive data table of all Student-Mentor pairings.

3. UI Layout & Component Requirements

- Summary KPI Cards: Active Student Count, Active Mentor Count, Unassigned Help Requests.
- Interactive Filterable Table: Student Name, Mentor Name, Venture Name, Category (Finance, Tech, GTM), Status Badge.
- Quick Action Drawer: Allows admins to re-assign mentors to student projects directly from the table.
- Export Options: Download CSV/PDF interaction report for incubator board meetings.

4. Development Roadmap

- Q3 2026: Integrate Mentor-Student Interaction Panel component into page.tsx.
- Q4 2026: Add real-time live updates when mentors reply to student requests.
- Q1 2027: Incubator Cohort Analytics & mentor workload balance charts.
